DISC BRAKE PADS

VelveTouch disc brake pad products are owned and manufactured by Wellman Products Group, the global leader in severe-duty & high performance friction products. For nearly a century, Wellman Products Group has engineered and manufactured advanced technology friction materials for brakes, clutches, transmissions, and driveline components.

Wellman Products Group is renowned for providing friction solutions to both original equipment and aftermarket customers. Our products perform in demanding aerospace, on-highway truck, agricultural, construction, mining, powersports, motorsports, automotive, military, industrial, and specialty applications. With our exceptional research and development programs, we can provide superior friction materials designed to improve power management & durability for any application.

Our VelveTouch brake pad catalog promotes the latest in commercial fleet dry caliper friction technology. Whether it's cost per mile reduction, improved drivability or safety, VelveTouch Carbon Semi-Metallic brake pads will meet or exceed your expectations.

VelveTouch disc brake pads...setting a new standard in braking performance with every stop.

Future VelveTouch part FMSI no.	34

**VelveTouch Carbon Semi-Metallic disc brake pads are designed for severe-duty automotive and truck fleet applications. This unique formulation combines the performance and heat resistance of carbon fiber composites with the durability of traditional semi-metallic brake pads. Advanced friction technology partnered with the quality and safety of Aerospace design is the foundation of Carbon Semi-Metallic brake pads.**

### **F1 Carbon Semi-Metallic Compound**

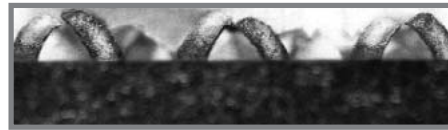

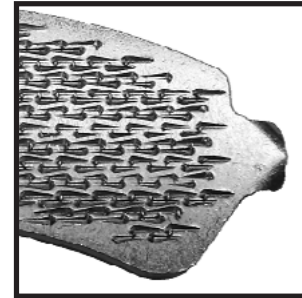

Engineered specifically for class 1 through 3 automotive and truck fleet applications.

- SUV, RV, Limo & Pickup Trucks
- Emergency Vehicles
- Police & Taxi
- Light and Medium-duty Commercial Trucks

### **F3 Carbon Semi-Metallic Compound**

Developed specifically for class 2 through 6 commercial truck fleets.

- Conventional Vans
- Large Walk-in Delivery Trucks
- School Bus
- Utility Vehicles
- Construction Vehicles

**NEW VelveTouch Innerlock System**

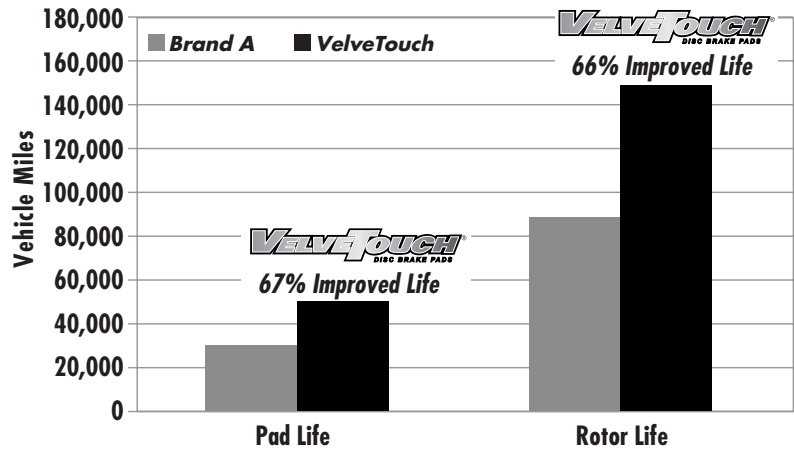

### **Key Features**

- **Extended Pad Life:** Up to 40% improved pad life, minimizing annual brake changes per vehicle.
- **Extended Rotor Life:** Carbon Semi-Metallic applies a micro-carbon transfer film on the rotor surface. This transfer film dramatically improves rotor life and minimizes the potential for rotor warpage and heat cracking.
- **Noise Pollution:** Unlike many traditional semi-metallic pads, Carbon Semi-Metallic is extremely quiet.
- **Safety / Fade Resistance:** Compared to traditional replacement pads, Carbon Semi-Metallic can operate 200 to 400 degrees hotter without significant friction loss.
- **Safety / Bond:** Carbon Semi-Metallic brake pads utilize world-class chemical and mechanical bonding technology and procedures. For the most severe braking applications, VelveTouch has developed the **new INNERLOCK system** which features hundreds of small extruded hooks that are molded directly into the friction material. In terms of bond and shear strength, there is no better product.

**VelveTouch Carbon Semi-Metallic disc brake pads provide value to today's commercial fleets.**

## On-vehicle Field Test

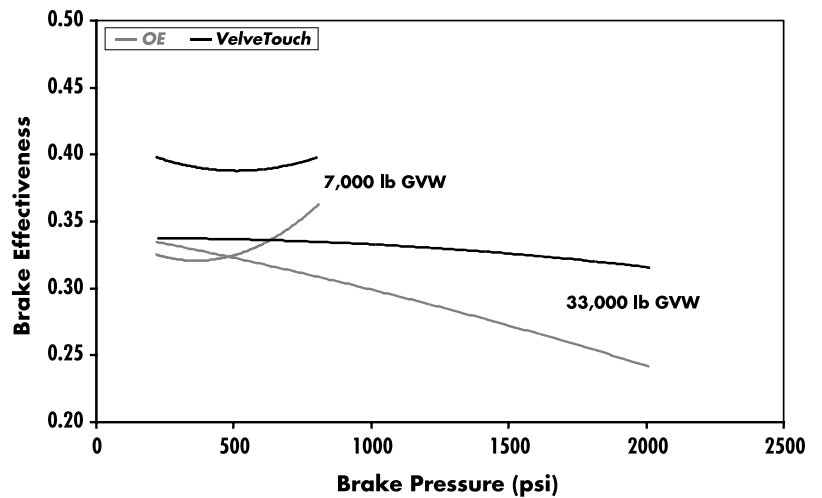

Recent on-vehicle tests show VelveTouch Carbon Semi-Metallic brake pads improve pad and rotor life up to 67%. Extended pad and rotor life minimizes annual per vehicle downtime, labor and material costs.

## Load Sensitivity Comparison of Brake Effectiveness

*Bosch UI-198 Dynamometer Performance Test*

VelveTouch Carbon Semi-Metallic F3 compound provides greater fade resistance and stopping power when compared to OE replacement pads.

## Brake Noise

It is important to understand that brake noise (squeal, groan, howl, etc) is generated by the brake system as a whole and can be greatly influenced by the installation. Below is a checklist of some key items to keep in mind when installing your VelveTouch brake pads.

- Rotor type – Make sure an OE or high quality replacement rotor is used.
- Rotor finish – insure the surface is clean, smooth and flat. If turned, apply a non-directional finish using a bead brush or 120 grit sand paper.
- Pad fitment – When installed the pad should fit snug with no rattle or movement. If this is not the case, inspect and replace hardware and abutment clips as necessary.
- Lubrication – Noise is typically a result of vibration being transferred between components of the brake system. Proper lubrication of these contact points can greatly reduce this from occurring. High temperature synthetic lubricant containing moly should be applied at all contact points of the pad and the brake system, making sure not to get any lubricant on the friction surface.
- Break-in – proper break-in of a new set of brake pads will deposit a transfer layer onto the rotor surface. This layer aides in creating a smooth contact between the pad and rotor eliminating potential vibrations.

## Sprinter Van Pad Identification

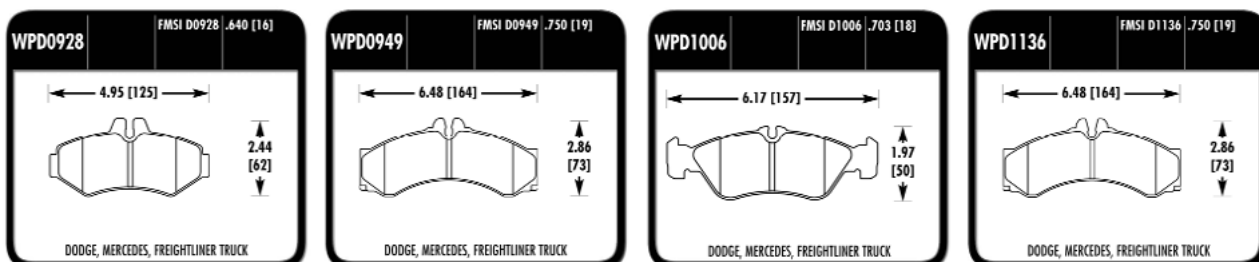

Due to the wide variety of brake systems on the Dodge / Mercedes / Freightliner Sprinter series it is important to make sure the proper brake pad design is selected when ordering VelveTouch Carbon Semi-Metallic brake pads. Below are the available systems.

### Front Axle: WPD0949 and WPD1136

*Note: Make sure you select the proper front axle pad. The primary difference between the D949 and D1136 is the wear sensor slot width.*

### Rear Axle: WPD0928, WPD0949, WPD1006 inner/outer, WPD1136
